JULY 5, 1994

PREFACE

1993 ELK HUNTING AND HARVEST REPORT

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 187 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 186 subpopulations were elk license holders who had drawn one of the 186 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HUNTERS	The number of hunters who hunted one or more days
HUNTER DAYS	Sum of whole days or portions of days hunted
PERCENT SUCCESS	The number of successful hunters divided by the total number of hunters and multiplied by 100
LOWER	Lower confidence limit at a level of confidence of 80 percent
POINT	The estimated value
UPPER	Upper confidence limit at a level of confidence of 80 percent
GEN ELK	An abbreviation for general elk license
GEN B10	An abbreviation for general elk license included in the nonresident B10 combination license
SP	An abbreviation for special permit
OTHER	Hunting or harvest information relating to hunters who held a special elk permit valid only in other hunting districts. Some unexplained (illegal or invalid data) kills are also listed under the "OTHER" category.
UNKWN	A symbol for unknown used to designate unknown sex

Explanations

The elk hunting and harvest statistics are estimates made from the sample of 60,453 questionnaires representing about 44 percent of all 138,934 elk license holders. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

The analysis and report program was extensively modified this year to more accurately estimate and report special elk permit holders who hunted and/or harvested elk in hunting districts where their

(CONTINUED)

permit was not valid. These estimates are included in the "OTHER" categories for resident and nonresident for each hunting district. All licenses and permits which are valid in a particular hunting district are listed with the district and represent all hunting and harvest estimates for those license or permit holders that occurred within the district. The "OTHER" category gives all hunting and harvest activity that occurred in the hunting district by special permit holders whose permits were not valid in the district but may have hunted using their general elk license. It is important to keep in mind that the "GEN ELK" or "GEN B10" categories apply to those individual hunters who possessed only a general elk license and no special elk permit. This rationale is the same as used in previous years, except that hunting and harvest activity for special permit holders occurring where their special permit was not valid was reported at the end of previous years reports and gave only kill estimates.

All valid response data were used in the estimates even when some data fields were missing. This is the reason for the various unknown categories given in the report. When the animal's age/sex is unknown or not reported the kill is listed under the "UNKWN" column. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively. All estimates represented are rounded to the nearest whole number. It is for this reason that rows and columns do not always agree exactly with row or column totals given.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

Time Period of Kill Report

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1993 ELK TIME PERIOD OF KILL REPORT

JULY 13, 1994

PREFACE

1993 ELK TIME PERIOD OF KILL REPORT

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 187 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 186 subpopulations were elk license holders who had drawn one of the 186 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

UNKWN................	A symbol for unknown used to designate unknown time period of kill
GEN ELK.............	An abbreviation for general elk license
GEN B10.............	An abbreviation for nonresident Big Game Combination license type B10
SP..................	An abbreviation for special permit preceding the special permit district/option designation
SPECIAL.............	Used in the regional or state summaries to designate combined special permits
OTHER...............	Hunting or harvest information relating to hunters who held a special elk permit valid only in other hunting districts. Some unexplained (illegal or invalid data) kills are also listed under the "OTHER" category.

Explanations

The elk time period of kill statistics are estimates made from the sample of 60,453 questionnaires representing about 44 percent of all 138,934 elk license holders. The total harvest estimate in each license category is given on the right side of each page. To obtain estimates of the actual number killed in a given time period, the percentages can be applied to the total harvest estimate.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the various unknown categories given in the report. The "UNKWN" time period indicates elk kills with missing time period data. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

(CONTINUED)

PREFACE (Continued)

This report for 1993 represents the third year that the time period of kill statistics have been expanded estimates rather than statistics based on the completed questionnaire sample. Reports previous to 1991 listed "SAMPLE NUMBER KILLED" above the right-hand column whereas this report lists "TOTAL HARVEST ESTIMATE".

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

1993 ELK ANTLER STATISTICS

JULY 13, 1994

PREFACE

1993 ELK ANTLER STATISTICS

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 187 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 186 subpopulations were elk license holders who had drawn one of the 186 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

ANTLER TYPE...	The number of points on each side
FREQUENCY.....	The number of occurrences of the given antler type in the given hunting unit within the expanded sample antler data collected
PERCENT.......	The percentage of the total represented by each frequency

Explanations

The elk antler point statistics are estimates made from the sample of 60,453 questionnaires representing about 44 percent of all 138,934 elk license holders. The frequencies and percentages are expanded estimates made from the sample data collected for antlered elk. Total estimated number killed in each hunting unit is given at the bottom of the frequency column.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

This report for 1993 represents the third year that the antler point frequencies have been expanded estimates rather than a frequency count of the collected sample data. This was done primarily to correct the occasional bias explained in the 1990 antler point statistics preface, but the change should also make the results easier to use.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

1993 ELK KILL LOCATION BY LAND OWNERSHIP

JULY 20, 1994

PREFACE

1993 ELK KILL LOCATION BY LAND OWNERSHIP

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 187 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 186 subpopulations were elk license holders who had drawn one of the 186 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HARVEST.......	The estimated number of elk killed
PERCENT.......	The percentage of the total harvest represented by harvest taken in a land ownership category

Explanations

The elk kill location by land ownership statistics are estimates made from the sample of 60,453 questionnaires representing about 44 percent of all 138,934 elk license holders. The frequencies and percentages are expanded estimates made from the sample data collected. Total estimated number killed in each hunting unit is given in the "TOTAL HARVEST" column.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

This report for 1993 represents the second year that elk kill location by land ownership data were collected and reported.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

SPECIAL SEASONS & TENTATIVE QUOTAS

- Applications must be postmarked by the U.S. Postal Service no later than June 1.
- Both resident and nonresident sportspersons are eligible to apply for the following licenses and permits awarded through the special drawings. Nonresidents are limited to, but not guaranteed, 10 percent of a district quota.
- Residents and nonresidents are required to purchase a general elk license prior to applying for a special elk permit or the A-7 antlerless elk license.

- A sportsperson who receives a special permit to hunt antlerless elk during all or any portion of the regular season (Oct. 24-Nov. 28) **is restricted to taking only an antlerless elk** in the district or the portion of a district for which the permit is valid (whether during the general or ARCHERY ONLY season). Permit holders are entitled to hunt elk, as specified in the 1993 big game hunting regulations, in all other elk hunting districts **OR** if your permit is valid for a portion of the district only, in all other portions of that hunting district (except those districts or portions of district restricted to "hunting by permit only").

  This restriction also applies if a permit is valid for only a portion of the regular season (for example, Oct. 24-Nov. 7 or Nov. 15-Dec. 15).

- Because some licenses and permits are valid only in a portion or portions of specified hunting districts, sportspersons should carefully note the district choice for which they are applying. A copy of the legal descriptions for "portion of district" areas is available at Fish, Wildlife and Parks Regional Headquarters and by **mail** from the Helena Headquarters, Wildlife Division, 1420 East Sixth Avenue, Helena, MT 59620.

Landowner Preference

- Montana landowners who qualify may receive preference in the elk permit and A-7 antlerless elk license special drawings. To qualify, the applicant must own or be contracting to purchase at least 640 acres of contiguous land used by elk or where elk are known to occur at anytime during the year. If the permit is valid for a portion of the hunting district only, the landowner must own land within that portion.
- Preference is available to resident and nonresident landowners and can be designated to a blood or marriage related individual or a person employed by the landowner. Only one person may use or designate preference in a partnership or corporation.

What is an A-7 License?

- An A-7 elk license is a special type of elk hunting license that allows the holder to shoot **only antlerless elk** in the district for which the license is valid. A-7 licenses are available in only a very limited number of areas and, in general, in areas where no other opportunities to harvest antlerless elk exist.
- If a sportsperson applies for and receives an A-7 license, these conditions apply:
  1) Sportspersons may not hold both a general elk license and a special A-7 license.
  2) The holder of an A-7 license must hunt **only** antlerless elk and must confine their elk hunting **only** to the hunting district for which their A-7 license is valid.
  3) They **may not** hunt elk (bull or antlerless) anywhere else in the state during the 1993 season.
- A-7 licenses are available only through the annual special drawings. Both residents and nonresidents may apply for these licenses. If successful in drawing an A-7 license, the sportsperson will be sent a letter of notice along with A-7 license purchasing information.
- The following districts offer A-7 antlerless elk licenses through the special drawings: 240, 250, 261, 270, 282, 311, 329, 520 and 843.
